

Experiment 10: Linux Commands in Kali Linux

Aim

To execute and understand the free, sort, and history commands in Kali Linux.

Procedure

1. Open the Kali Linux terminal.
2. Type each command and press Enter.
3. Observe the output displayed in the terminal.
4. Record the sample inputs, outputs, and results.

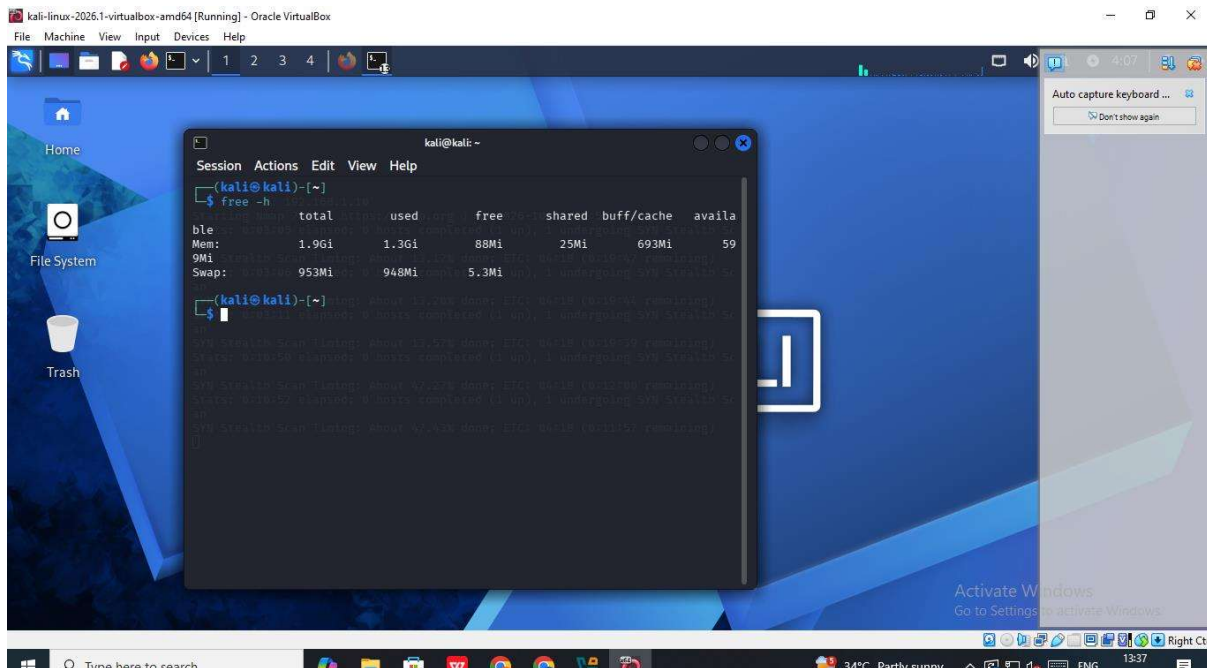

Commands / Code

(i) Free command

Sample Input:

```
free -h
```

Sample Output:

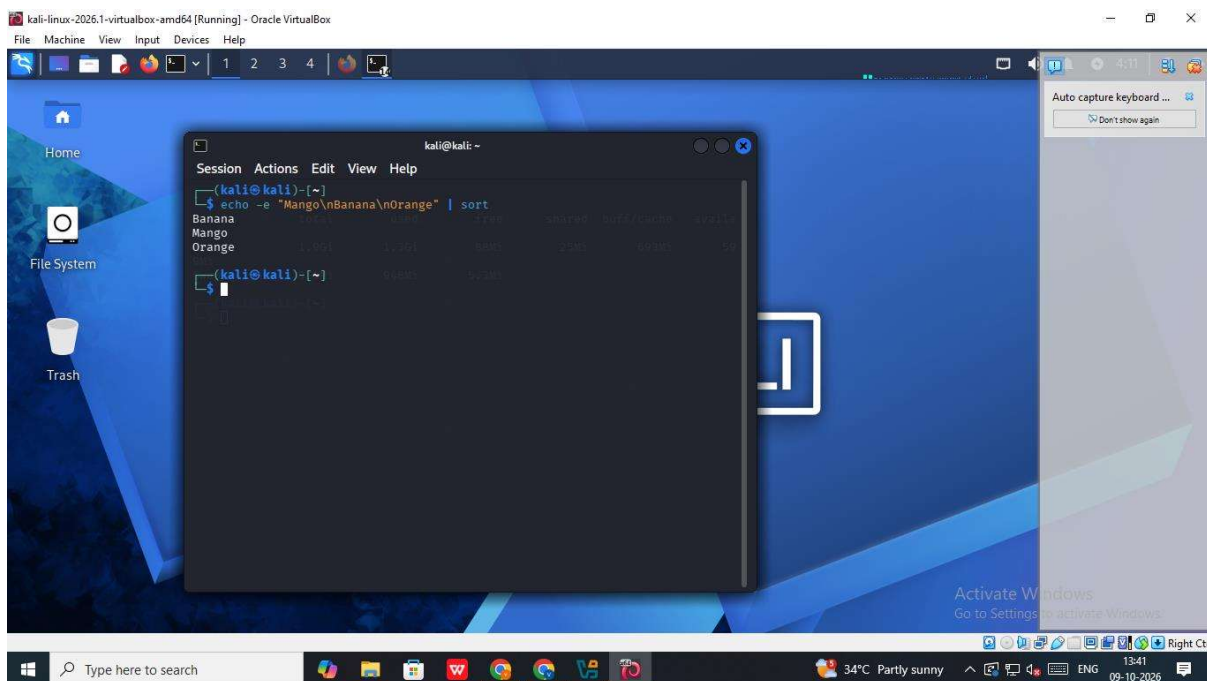

(ii) Sort command

Sample Input:

```
echo -e "Mango\nApple\nBanana" | sort
```

Sample Output:

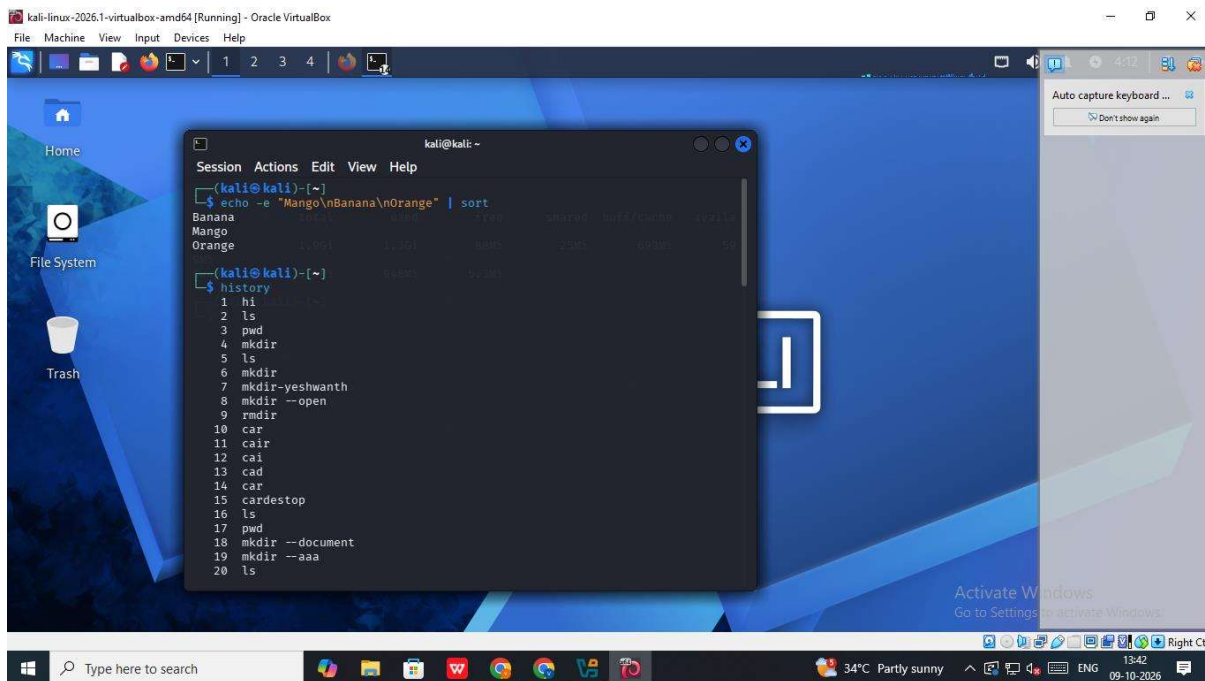

(iii) History command

Sample Input:

history

Sample Output:

The screenshot shows a Kali Linux terminal window with the following output for the `history` command:

```
kali@kali: ~  
$ history  
1 hi  
2 ls  
3 pwd  
4 mkdir  
5 ls  
6 mkdir  
7 mkdir-yeshwanth  
8 mkdir --open  
9 rmdir  
10 car  
11 cair  
12 cai  
13 cad  
14 car  
15 cardestop  
16 ls  
17 pwd  
18 mkdir --document  
19 mkdir --aaa  
20 ls
```

4. Result

The free command displays memory usage, the sort command arranges text in order, and the history command displays previously executed terminal commands in Kali Linux.
